PROFESSIONAL EXPERIENCE

SEP 2025 - PRESENT | GRONER | HYBRID

Tech Lead

- **GronerZap** - conceived and built a WhatsApp contact center native to the CRM, replacing a vendor that cost over R\$30k a month. It serves hundreds of companies and thousands of users, on Meta's official API and three other providers.
- **Solar financing** - built on my own the CRM's integrations with 4 banks and credit providers (Solfácil and Sol Agora live; Banco BV and Revocred, from Conectepag, in certification), from simulation and credit pre-analysis to proposals and status webhooks, working directly with the partners' teams.
- **Gamification** - conceived and maintain the module that lets companies reward any operation, not just sales; built its first version, rules engine and front end. Also shipped internal chat and dozens of other modules.
- Led 6 developers across different periods; technical reference on estimates, approach, feasibility and feature sign-off with teams, the CTO and Product.
- **Stack:** Everything from previous roles + Lambda, API Gateway, DynamoDB, SQS, S3, CloudFront, ECS, EC2, RDS, Meta Official API, GCP (Maps and Calendar).

FEB 2025 - SEP 2025 | GRONER | HYBRID

Mid-level Full Stack Developer

- Developed and maintained Groner CRM, API and microservices.
- **Service Orders** - built with the CTO a field-service module in the vein of Field Control and Auvo, rolled out at client Resolve Energia Solar, which led dozens of customers to upgrade to the top plan.
- Built new features, resolved technical issues across teams, and collaborated closely with the CTO.
- Conducted code reviews and mentored junior developers.
- **Stack:** Everything from the previous role + C#, AWS, .NET Core, Entity Framework.

DEC 2023 - FEB 2025 | GRONER | REMOTE

Junior Front-end Developer

- Migration efforts for the new version of Groner CRM (formerly SafeLeads).
- Replicated legacy system features and introduced new functionalities with unit-tested, scalable code.
- Fixed both legacy and new bugs to ensure high platform stability.
- **Stack:** Vue.js, Quasar, Node.js, Express.js, Jest, TypeScript.

APR 2023 - OCT 2024 | SELF-EMPLOYED | REMOTE

Freelance Web Developer

- Built web apps, software and mobile apps for clients with JavaScript technologies.

- **AMORC** - React Native app for Instituição Rosacruz, where members share their work, contribute to the community, organize events and log day-to-day errands.
- **Inversion** - Vue.js front end of an app to organize finances and manage investments, earnings, wallet and projections, with a Java back end.
- **SplitWave** - Astro and Vue.js website on AWS RDS and Vercel, where students of a seismic anisotropy specialist upload and browse records of seismic events.
- **Stack:** TypeScript, JavaScript, React, React Native, Next.js, Vue.js, HTML, CSS, AWS, Google Cloud.

OCT 2022 - MAR 2023 | MIRENE CONFECÇÕES | REMOTE

Junior Full Stack Developer

Designed and developed an institutional website and an ERP system for managing financial operations, customer data, product catalog, generating quotes for clients, etc.

Stack: Astro, TailwindCSS, Vue.js, Bun, Hono, Google Cloud Run, Docker, Vercel, TypeScript.

APR 2022 - AUG 2022 | JVM WEBMARKETING | REMOTE

Junior Front-end Developer

Responsible for developing responsive websites with React and Next.js for a marketing startup's portfolio.

ACADEMIC BACKGROUND

2024 - 2026 | SYSTEMS ANALYSIS AND DEVELOPMENT
